

DRAW SANTA CLAUS USING CIRCLES!

Pro Tip: Draw all pencil lines lightly because most of them will be erased at the end.

Using your pencil:

1. Place the largest circle (masking tape roll or large lid) in the center of the paper and lightly trace it.
2. Lightly trace the juice bottle cap on upper left side of the circle
3. Draw a horizontal line that splits the large circle in half.
4. Under the line, lightly trace the quarter two times to make the eyes
5. Place the dime center-below the two eyes and trace (for the nose.)
6. Center the nickel directly underneath the large circle and trace.
7. Using the penny, trace it several times along the bottom half of the large circle (making the side-burns and mustache). And then use the same technique to make the outline of the beard
8. Use the dime to make pupils
9. Using your eraser, erase all the lines that you don't need (like in the picture below) and you will begin to see Santa!
10. Using a pen, go over the lines to darken the lines and make them stand out
11. Using your pen, have fun adding details. Be creative. Experiment. You can also use colored pencils, crayons and/or different colored markers

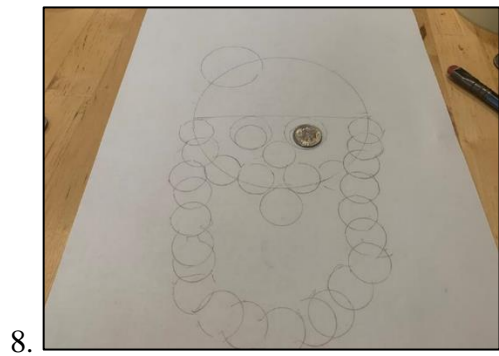

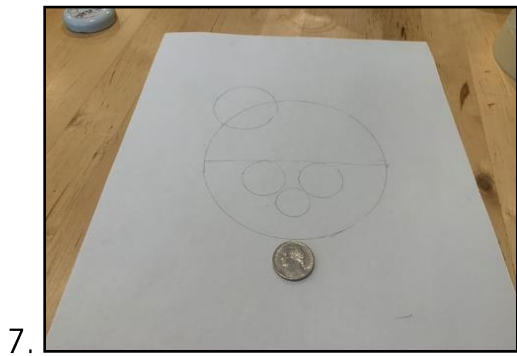

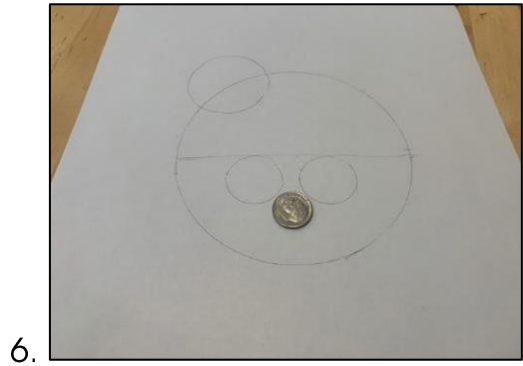

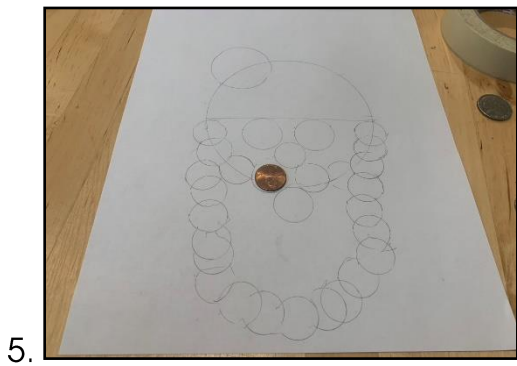

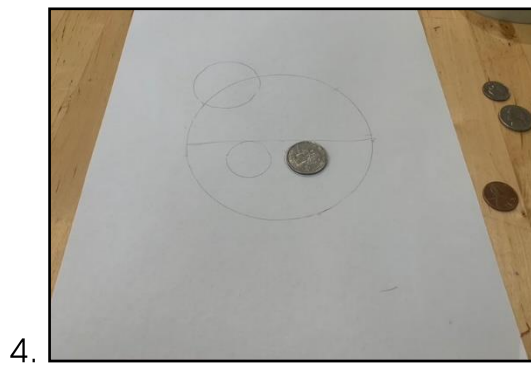

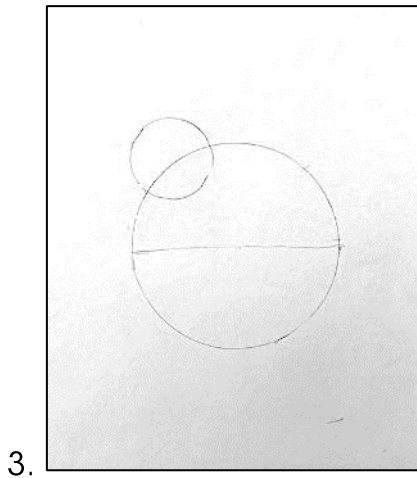

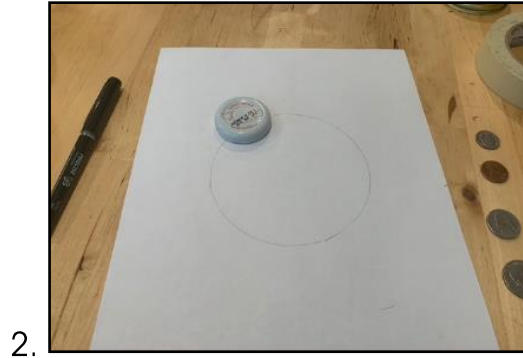

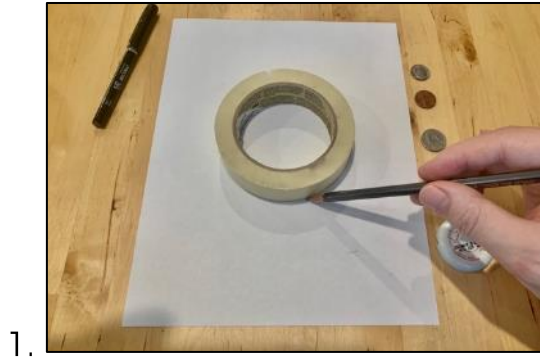

Not sure what it should look like? Follow along with the helpful step-by-step photos below:

Materials:

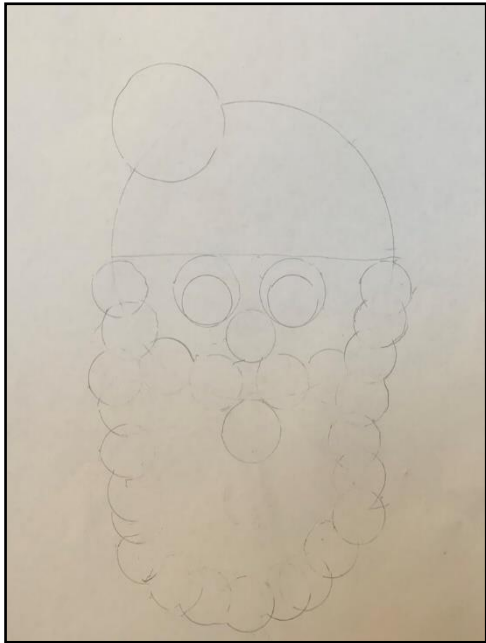

- pencil with eraser
- ink pen
- piece of paper
- 5 different shaped circles to trace: dime, penny, nickel, quarter, juice bottle cap, a roll of masking tape (or large mug or jar lid)
